Project Management in Development Professional (PMD Pro) Certification Training

NATIONALLY RECOGNISED & INTERNATIONALLY ACCREDITED

OVERVIEW

Project Management in Development Professional (PMD Pro) is a specialized, internationally recognized certification for Project Managers. PMD Pro is aligned with existing internationally recognized project management standards and components.

The course was developed in order to optimize international project investments and improving professional project management skills in the development sector.

NB: The PMD PRO training is a methodology similar to the PMI PMP/CAPM and Prince2 Certifications – and is based on both these, and other, Project Management methodologies.

METHODOLOGY

Well-balanced theoretical and practical methodology, which includes interactive discussions, case studies, interactive activities/exercises and assignments to understand the concepts and their applicability

WHAT YOU WILL LEARN

Section One:
- Why do projects matter?
- How to define projects and project management?
- How do projects fit in the larger strategic culture of development organizations?
- What are the roles/responsibilities of the project manager and the project team?
- What competencies are required to be a successful project manager?

Section Two:
- Project Identification and Design
- Project Set Up
- Project Planning
- Project Implementation
- Project Monitoring, Evaluation and Control
- End of Project Transition

Section Three:
- Scope Management
- Time Management
- Project Resource Management
- Risk Management
- Project Justification Management
- Stakeholder Management

Section Four:
The PMD Pro is not a template to be applied indiscriminately to all projects and by all organizations. It is important to remember that each development organization is unique. Furthermore, within a single organization, projects will vary considerably in terms of value, complexity and risk. Recognizing that development organizations and their projects are unique, this Section 4 examines approaches project managers can employ to adapt the PMD Pro Project Management methodology approaches to the context in which their projects work.

FEE

USD 1,450/ per person
